SITA RECLINER CHAIR FOR GENERAL PRACTICE, OFFICE AND CLINICS.

SITA is the chameleon among chairs for clinics and surgeries. Its adaptability to a wide range of applications, supported by versatile accessories, accentuates perfectly its attractive price-performance ratio. Whether fixed or mobile on castors, it is used primarily for blood collection and infusion therapy, for treatment or as a rest and acupuncture chair. The generously dimensioned upholstered surfaces, optionally available in many colours in the super-soft GREINER premium material, the upholstery and the softly-constructed arm rests ensure a high level of patient comfort.

Operation is as simple as it is convenient: when the right-hand operating lever is pushed back, the mechanism unlocks the backrest and can be steplessly moved horizontally. When discharged, it self-aligns thanks to a pneumatic spring. The forward lever position regulates the leg rest, also supported by a pneumatic spring. Perfect ergonomics for patients. And helpful relief for the nursing staff, whose tasks are best supported by a stable base with capacity for 220 kg patient weight, individually steerable 10 cm castors and a handle on the mobile model, as well as accessories such as phlebotomy armrest, infusion rod, patient table and the standard bars for attaching individual utensils.

SITA – perfect for patients and caregivers

Robust base with smooth-running castors

Patient table detachable and movable, at right hand side

Blood collection armrest with ball joint

Versatile colour options in the compact and premium upholstery fabrics
