

BodyLab

YOUR WAY TO A PERFECT BODY
BUILD UP YOUR MUSCLES THANKS TO
NEUROMUSCULAR STIMULATION

APPLICATION

- + Muscle building

MUSCLE TONING USING FMS TECHNOLOGY

The BodyLab is a body-forming system that uses innovative FMS technology (Focused Magnetic Stimulation). The patient's muscles are stimulated with supramaximal contractions (up to 2.5 Tesla), thereby increasing the metabolism and has a positive effect in various parts of the body. The BodyLab works on many areas of the body and reduces localised fat deposits. Treatment with the BodyLab can significantly increase muscle size, make them more defined, and improve posture – in just a few sessions.

The purpose of the supramaximal stimulation of the muscles is to improve muscle tension and to induce a strong metabolic reaction. This procedure brings many benefits, including minimising health risks such as type 2 diabetes, high blood pressure, heart disease, strokes and post-pregnancy discomfort.

Treatment consists of around eight twice-weekly 30 to 45 minute sessions. For longer lasting results, we recommend following this up with at least one further treatment every three to six months.

**A technology
that works.**

- +** Supramaximal contractions for deeper muscle stimulation
- +** Positive effects on general health
- +** Muscle building due to stimulating rapid nerve discharge and fibre contraction

2.5 TESLA
INTENSITY

PRESET AND
CUSTOMISABLE
PROGRAMMES

EASY TO USE,
INDEPENDENT
TECHNOLOGY

UP TO 150 HZ

Handpieces

BodyLab

Two pads are available for the BodyLab treatment. These are suitable for use on the stomach, buttocks, hips, legs and arms.

- + Supramaximal activation
- + No dermo-epidermal intervention
- + Effective on different regions of the body
- + Non-invasive system
- + Positive effects on general health
- + Maximum comfort – completely painless procedure
- + Easy to operate

The BodyLab works on different parts of the body, shaping and enlarging muscles and improving posture in just a few sessions.

Treatment areas

+ Abdomen

+ Buttocks

+ Hips

+ Legs

+ Arms

ASCLEPION

EXPERTISE, EXPERIENCE, SUCCESS

Asclepion Laser Technologies has been one of the leading manufacturers of advanced laser systems for dermatology, aesthetic medicine and surgery on the international market for medical lasers for over 40 years. The company is located in the so-called "Optical Valley" in Jena, known around the world as the home of the German optics industry, and continuously invests in the research and development of new technologies. Today, customers in more than 70 countries trust the Made in Germany technology and the proven scientific expertise of Asclepion.

BodyLab, Asclepion's first generation of products for body treatment, is backed by effective technology, maximum safety and the highest quality.

MORE THAN

10 000

users world-wide

MORE THAN

10 000 000

patients treated
successfully

For us, high quality also means having a customer-oriented approach. That is why we work hard every day to provide not only the best technology, but also full service, to give you all-round support.

TRAINING & EDUCATION

Both regional and international training courses are organised regularly in our training centre in Jena. In this way, we provide our customers with all of the knowledge that they need for the safe and effective use of our laser devices.

TECHNICAL SPECIFICATIONS

Technology	FMS technology (Focused Magnetic Stimulation)
Intensity	Up to 2.5 T
Frequency	1 Hz to 150 Hz
Pulse duration	200 μ s to 300 μ s
Display	10.4" LCD with touchscreen
Dimensions	34 cm x 90 cm x 67 cm (W x H x D)
Weight	Approx. 60 kg

(Specifications are subject to change without notice)
